G R U P P O
PORCARELLI

DIAMO VALORE AI RIFIUTI
ieri, oggi, domani.

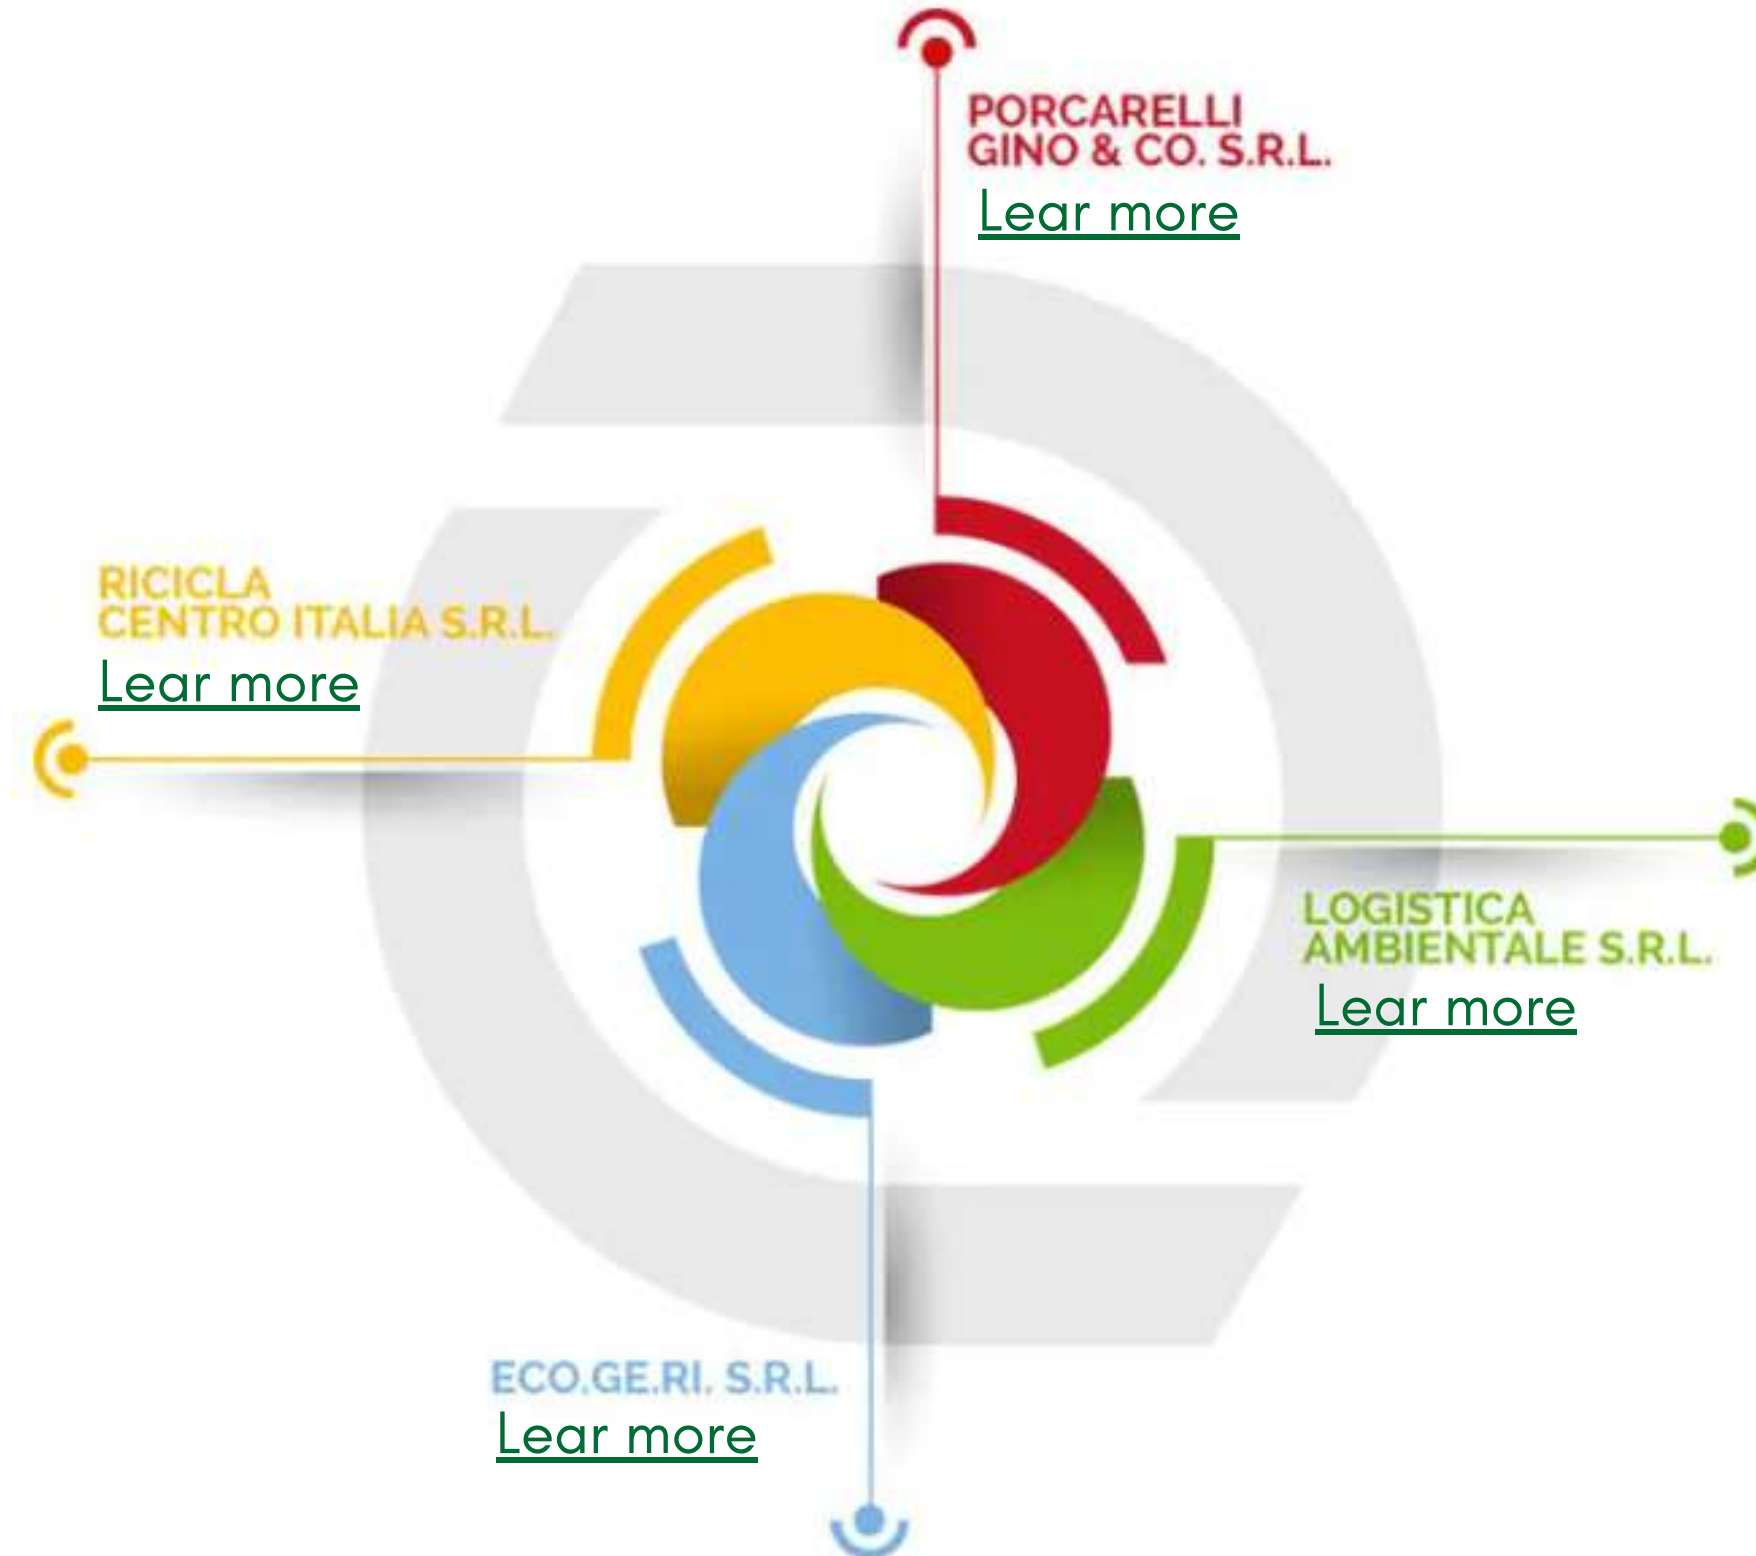

About us

Porcarelli Group, with its more than **300** employees and collaborators, is the result of a project in which Mr. Gino Porcarelli and his sons have believed and for which they have been working for more than **50 years**. Founded as an expansion and adaptation to the demands of the market, has become today an important reality for quantities of waste managed, facilities and know-how. Every year we move, manage and send for recovery significant amounts of waste that would otherwise increase the increasingly crowded landfills.

The Group's companies are present with their activities along the entire Circular Economy supply chain, from collection to transport to the valorisation of raw materials, both on domestic and foreign markets, ensuring traceability along the entire route and throughout the life of the waste until its transformation or landfilling. For this reason, those who choose to operate in respect of nature and its delicate balance find in Porcarelli Group an optimal travel companion and in all of us, who are part of it, a help to manage the recovery of waste materials in an intelligent way. This is how thousands of tons of waste can re-enter the production cycles reducing the consumption of virgin raw materials and energy to the benefit of the environment and the entire community.

Four companies, one goal: **VALUING WASTE.**

COMPANY HISTORY

Oggi

2022

Five operating plants for the management of different types of waste and a **service company**.

2016

Post earthquake reconstruction of the **Eco.Ge.Ri.** plant and restart with a new project

2008

Porcarelli Gino & Co. Srl acquires a new plant in **Rome** and another one in **Civitavecchia**

2002

Porcarelli Gino & Co. Snc becomes **Porcarelli Gino & Co. Srl**

1989

Constitution of **Logistica Ambientale Srl**
Ricicla Centro Italia Srl
Eco.Ge.Ri. Srl

1970

Constitution of **Porcarelli Gino & Co. Snc**

Constitution of the individual company **Porcarelli Gino**

Mission

We continue to pursue our rational concept of 'Zero Waste', recycling ever higher quantities of waste, thanks to innovation and automation, exploring new markets where to place the recovered waste and proposing ourselves as the driving force behind this new industrial revolution.

Vision

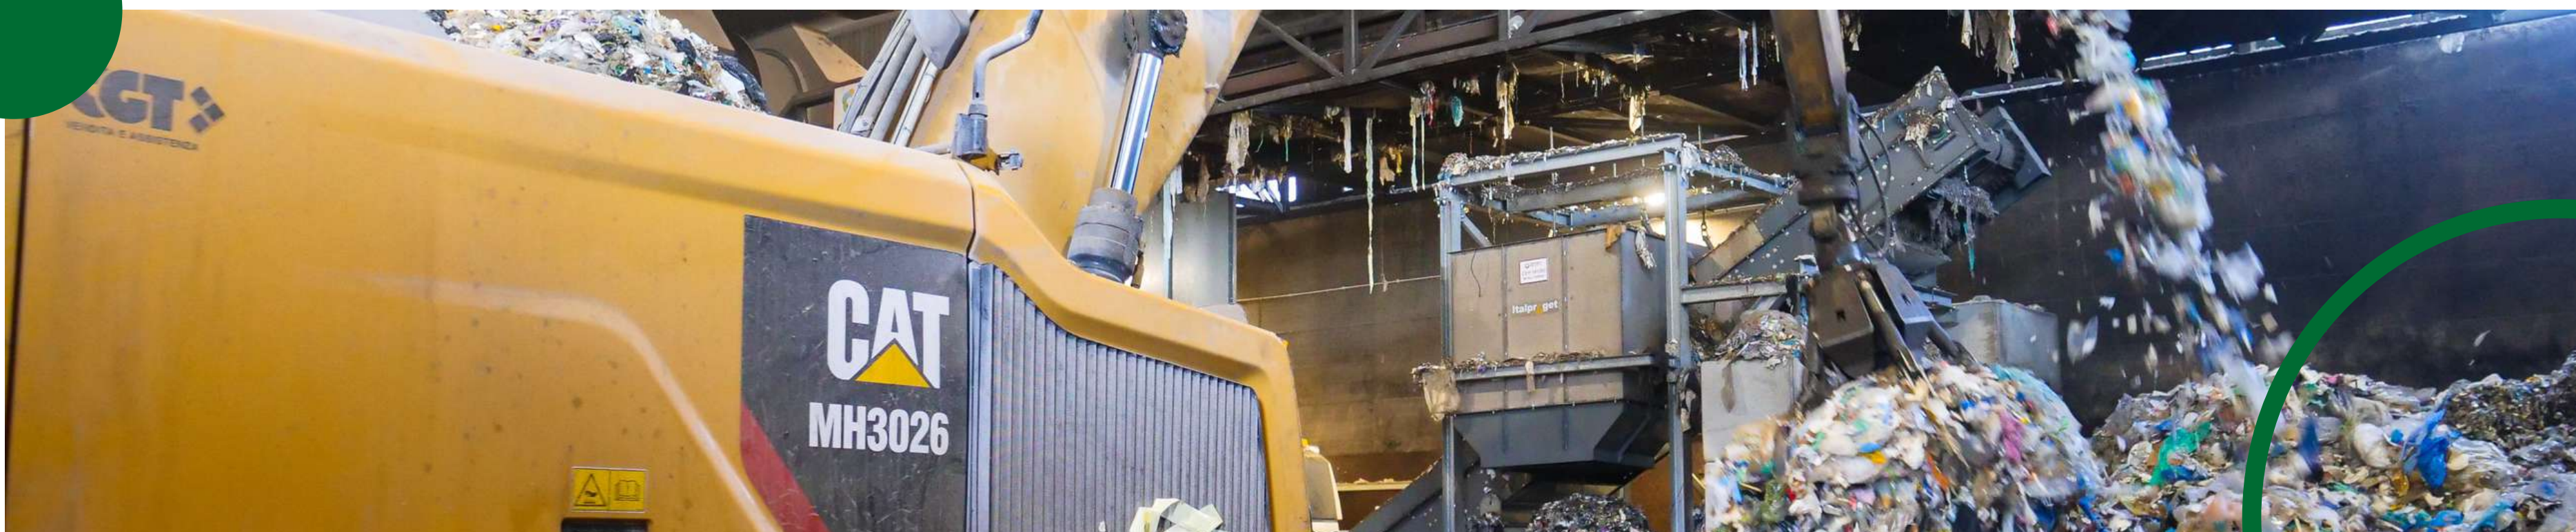

We are aware that waste can have negative impacts on natural systems, that's why we strive to return it to the market as raw materials following the principles of Circular Economy and we are committed to treat them with all precautions to protect the Environment.

Porcarelli Gino & Co.

Porcarelli Gino & Co S.r.l. is the mother of all Porcarelli Group Companies. Located in Rome in the industrial complex of Rocca Cencia, the company has a mechanical treatment plant, aimed at the recovery of raw materials and the production of Solid Recovered Fuel (SRF), with an adjacent plant for the pre-treatment of mixed municipal waste.

In addition, Porcarelli Gino & Co. has a multipurpose platform located in the industrial area of Civitavecchia for the selection and recovery of waste from separate collections and for the storage of hazardous and non-hazardous waste.

THREE TREATMENT PLANTS, ONE GOAL: valuing waste

Porcarelli Gino & Co. plants have been designed and built with the aim of recovering from waste the raw materials and giving value to the residual fractions as quality Solid recovered fuel (SRF), to be used as an alternative to traditional fossil fuels in thermal processes for energy production.

Ricicla Centro Italia

Ricicla Centro Italia continues the activity that has always represented the core business of the Porcarelli family, that is the recovery, valorization and trade of paper and cardboard.

Located in the industrial area of the Municipality of Monte Compatri, a few steps from Rome, with its 15,000 square metres of available area, it represents one of the most efficient and important paper sorting plants, thanks to its 16 sorting stations. More than 70,000 tons of paper waste per year are valorized in our plant through a process of selection, sorting and grouping by similar product fractions, obtaining secondary raw materials to be sent to national and foreign paper mills for the production of new paper.

[Index](#)

Paper and cardboard are not the only business of the company. In fact, thanks to the technologies and the selection inside the facility, we are able to valorize also plastic and glass, representing today one of the most important platforms for the service to the Municipalities of the Metropolitan City of Rome, for the delivery of the separate collections.

Logistica Ambientale

Logistica Ambientale is the company of the Porcarelli Group specialized in the management of waste at public and private Companies and Businesses, but also of private citizens. From the phase of their production until the delivery to the destination plants, Logistica Ambientale is able to provide micro and macro-collection transport services.

This company operates with its own equipment in the centre of Italy, but thanks to the national network of partners (who are screened before being qualified as such) it can guarantee the same quality standards in every part of Italy. Enrolled in the National Register of Environmental Managers for categories 1 – 4 – 5 – 8 – 9 – 10 it is authorized to transport any type of waste, as well as to manage collection centers and the remediation of contaminated sites.

Eco.Ge.Ri.

Based in Finale Emilia, Eco.Ge.Ri. is a project that looks at the future.

With the precise intention of developing its core business, focused on the treatment and valorization of waste, the new plant, first in the Emilia-Romagna region for the type of technology adopted, deals with the production of high quality Solid Recovered Fuels (SRF), resulting from the processing of the production waste that comes from non-hazardous special waste treatment plants.

[Index](#)

The Eco.Ge.Ri. plant has the dual purpose of recovering from waste the highest possible percentage of materials to be used as an alternative to raw materials (to be reintroduced in the production cycles of goods – End of Waste) and to produce an alternative fuel to traditional fossil fuels. To achieve this, the plant is equipped with the best 4.0 technologies that allow, in addition to continuous monitoring, to classify the treated waste and produce a SRF that meets the highest analytical standards.

The SRF is useful for the production of energy that can take place in thermoelectric power plants and cement plants.

COMMITMENT TO SAFETY AND THE ENVIRONMENT

We have obtained **UNI EN ISO 9001:2015**, **UNI EN ISO 14001:2015** and **UNI ISO 45001:2018** certifications for all Group companies, as well as **UNI EN 15358:2011** certification for the production of SRF for Porcarelli Gino & Co and Eco.ge.Ri. company and also **EMAS** and **SOA** certification for Logistica Ambientale.

Porcarelli Gino & Co. and Logistica Ambientale also received the **Legality Rating** by the Italian Competition Authority. In addition, Logistica Ambientale gained the **Gold Medal** of the **ECOVADIS** platform for Corporate Social Responsibility and sustainable purchasing.

TREEDOM PROJECT

Commitment to the environment is fundamental for our Group. This is where the collaboration with the Treedom project was born, with which we are committed to giving back to the environment what is inevitably taken from it by daily actions.

Visit our Forest

Thanks to the trust that our customers daily place in us, in 2021 the Porcarelli Group Forest was born, a plantation of 500 trees destined to grow year after year to reduce CO2 emissions and protect local biodiversity. One seed at a time, we can offer a sustainable alternative to monoculture, absorb CO2, protecting local biodiversity by prioritizing the planting of local species and offering shelter to animals.

Index

SPORT COMMITMENT

The Porcarelli family has always been close to sport, as a teaching of life. In particular, in recent years, we have increased our commitment to various sports clubs.

We got closer to cycling, basketball and football, founding the Logistica Ambientale Team, supporting Virtus Valmontone and Minipulcini Porcarelli.
